

**ABSTRACT**

The present invention relates to a control apparatus and a method, a recording medium and a program, which enable to control devices more efficiently and quickly. As  
5 information of the devices that can be controlled by a remote controller 1 by way of a personal computer 351, the address information of a television receiver 21 and a personal computer 31, which are connected via a wireless LAN to the personal computer 351, are provided from the personal computer 351 to  
10 the remote controller 1. Between the remote controller 1 and the television receiver 21, and between the remote controller 1 and the personal computer 31, a variety of information are sent/received by way of the personal computer 351, and these devices are controlled by the remote controller 1. The present  
15 invention is applicable to an information processing apparatus, which can control by wireless communication a variety of AV equipment, appliances, and the like.
